

32_MMBX-50-0-11

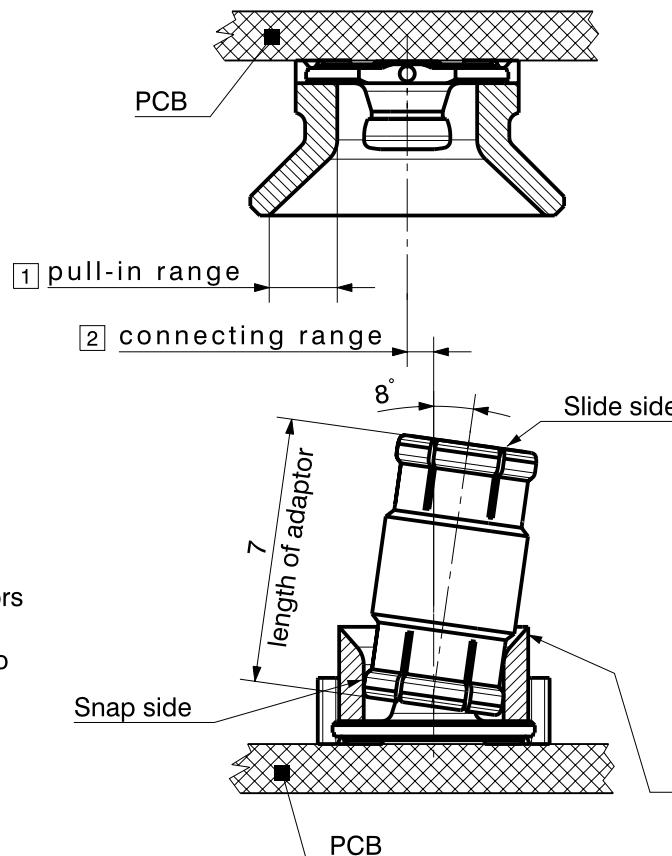

MMBX application instructions are available at www.hubersuhner.com or from your local HUBER+SUHNER sales representative

- [2] If the misalignment between the PCB connectors is bigger then the specified tolerance for the connecting range, a "blind" assembly of the two PCB's is not longer possible.
In this case a manual lead-in is necessary.
- [1] The pull-in range is in relation to the geometry of the PCB connector. Diameter of lead-in.

Pull-in range on PCB connector [1]	Connecting range [2]	PCB connector with mentioned pull-in range (for example)
1.8	max. 0.7	82_MMBX-S50-0-13
0.95	max. 0.1	82_MMBX-S50-0-3
0.65	not possible	82_MMBX-S50-0-1

Connecting range

The connecting range is the maximum misalignment which allows a trouble-free connection with the counter PCB (blind mate). (including maximum swiveling angle of adaptor)
